- 07** Your payslips
- 08** Emergency button
- 09** My settings

01 Signing in

Open the officer app on your phone or the web and sign in with the username and password your supervisor gave you. Choose "Officer app" if you are asked where to land.

Your name, call sign and employment status always show at the top once you are in, so you can check at a glance that you are signed in with the right account.

02 Clocking in and out

Your home screen shows your next or current shift with a Clock in button. Tapping it checks your location against the site before accepting the clock-in.

Clocking in more than 5 minutes either side of your rostered start — or with no shift booked at all — asks for a short reason. Control or an admin reviews it; you are clocked in straight away either way, so this never blocks you from starting work.

Your current job
Clocking in late or early asks for a one-line reason before continuing.

03

Any job dispatched to you appears immediately under Current job with the address, instructions and a way to update your status as you respond, arrive and resolve it.

When nothing is dispatched the screen simply says so — there is nothing to acknowledge or dismiss.

Before going somewhere alone or into a higher-risk situation, set a welfare timer: choose how long until you must check in, and a short note on what you are doing.

If the timer runs out without you checking in, control is alerted with your last known position — this is your lone-worker safety net, so use it any time you are out of regular contact.

05

Reporting an incident

Use Incident report for anything out of the ordinary — from a minor issue to a RED or CRITICAL alert. Severity, type, what happened and anyone involved all go on the one form.

A HIGH or CRITICAL severity alerts control immediately, so pick severity honestly rather than defaulting to the lowest option.

The screenshot shows the 'Incident report' screen in the Echelon Officer App. The app's logo is in the top left, and the time '14:21' is in the top right. A sidebar on the left contains navigation options: 'REPORTS' (with a sub-option 'Reports'), 'FLEET & PEOPLE' (with a sub-option 'Rota'), and 'ME' (with sub-options 'Officer app' and 'My settings'). The main form area is titled 'Incident report' and includes a 'LINK UP' button. The form fields are as follows:

- Site:** Northgate Distribution
- WHEN IT HAPPENED ***: 04/10/2026 14:20
- SEVERITY ***: HIGH or CRITICAL alerts control immediately. Below this is a dropdown menu showing '— choose —'.
- TYPE ***: Below this is a dropdown menu showing '— choose —'.
- EXACT LOCATION**: An empty text input field.
- WHAT HAPPENED ***: A large text area for describing the incident.
- PEOPLE INVOLVED (DESCRIPTIONS, NAMES IF KNOWN)**: A large text area for listing involved personnel.
- Police attended or were called**: A checkbox that is currently unchecked.

06

Requesting leave

Employed staff can request annual, sick, unpaid or other leave directly from the app. Pick the dates, add a note if useful, and submit — your running balance for the leave year is shown above the form.

A pending request can be cancelled from the same screen; once approved or rejected you will see the outcome here too.

A screenshot of the Echelon Officer App interface. The app is titled 'Echelon' at the top left. A sidebar on the left contains navigation options: 'Home', 'My requests', 'My schedule', 'My settings', and 'My profile'. The main screen displays a 'Request leave' form. The form has a title bar 'Request leave'. Below it, there are fields for 'TYPE' (set to 'Annual'), 'START DATE' (19/10/2026), and 'END DATE (LEAVE BLANK FOR A SINGLE DAY)' (21/10/2026). There is an optional 'NOTE' field containing the text 'Family wedding'. At the bottom of the form are two buttons: 'Submit request' and 'Close'. The background of the app is dark blue.

07

Your payslips

Once a payroll run has been approved and issued, your payslip appears under My payslips with the period, pay date and net pay, and a PDF you can download or print.

Only issued payslips ever show here — a run still being checked by an admin is never visible to you, and a payslip never changes again once it has been issued.

08

Emergency button

The red EMERGENCY button on your home screen raises an immediate alarm to control with your location. Use it for officer-down or any situation where you need help right now.

Control sees a red alert the moment it is raised and will not clear it until the situation is confirmed resolved — so only **My settings** you have been told to.

09

My settings (bottom of the menu) is where you can adjust your own device preferences — layout, theme, sounds, reduced motion — without affecting anyone else's login.

Your account details (username, display name, role) are shown read-only here; ask an admin if any of those need to change.

Layout on this device

This looks like a desktop or laptop. Automatic uses the desktop layout here.

Automatic

Applies straight away and is remembered on this device only.

Reduce motion

Turns off status-dot pulsing and modal/panel animation, beyond what your OS's own reduce-motion setting already does.
